DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-26 and 34, drawn to a system/method of managing inter-connected networks having a SIP client, classified in class 709, subclass 218.
 - II. Claims 27-31 and 33, drawn to a call management system/method in a distributed switching network, classified in class 370, subclass 401.
 - III. Claims 32, drawn to a method of testing members of a group of SIP clients, classified in class 379, subclass 15.01

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combinations and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combinations as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombinations has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combinations as claimed does not require the particulars of the subcombination as claimed because the system and method for setting up a conference call or testing members of a group of SIP clients can be facilitated without a step of a specific input arrangement. The subcombination has separate utility such as method of providing quality of service in VoIP.

Art Unit: 2143

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey C. Pwu whose telephone number is 571-272-6798.
